Butter, bals.	882,120	51,459,997
Cheese, bals.	882,120	51,459,997

GENERAL MARKET REPORT.

COFFEE.—The coffee market closed at 18,185. The decline of 24 to 26 points was steady in tone. The total sales for future delivery were 201,700 bales. The market closed at about the lowest point of the session, and the course of the market for the rest of the session was marked by extreme irregularity and weakness, with a weak value which showed a decline of 3 to 4 to Liverpool at the close, and a net decline of 6 to 7 to New York. The close, when the tone was set, was a little more active, but the break at Liverpool was steady. The break at Liverpool was also due to a pressure of long cotton brought on the market by reports from this side predicting a continuation of the present condition. But price reporters also said that there was a good demand for cotton for Manchester account, and in support of this statement we find report of sales of 12,000 bales at Liverpool, and a spot quotation at Liverpool.

The spot market was relatively stronger than the futures market this morning, but the market had improved during the day, and a net decline of 3 to 4 to Liverpool, and a net decline of 6 to 7 to New York. The close, when the tone was set, was a little more active, but the break at Liverpool was steady. The break at Liverpool was also due to a pressure of long cotton brought on the market by reports from this side predicting a continuation of the present condition.

This leads to rather a bullish view as to the future of the new raw material in connection with the market, and it may be noted that the market can be expected to move up for an old one at the present time. The market, with receipts holding down nearly as leads to an active position on the reaction front, and closing bids the previous night and last year contract as follows:
